

Cape Canaveral Air Force Station ESPC – AECOM Press Release

14 Sept 2017

AECOM, a premier, fully integrated global infrastructure firm has been selected for a potential energy savings performance contract (ESPC) award by the US Army Corps of Engineers, Engineering and Support Center, Huntsville to implement energy and cost savings measures at Cape Canaveral Air Force Station, Florida. This design-build project will be financed with private capital and guaranteed by AECOM on the basis of the project's energy savings.

Led by the Air Force Civil Engineer Center, Cape Canaveral AFS is looking to develop a fence-to-fence project that will increase energy efficiency and improve its infrastructure. Using advanced energy modeling to drive improved energy resiliency and increase mission assurance, the project will mix traditional energy conservation measures such as lighting and HVAC improvements with progressive strategies such as smart energy management controls. The project will also include waste water treatment plant improvements.

About AECOM: AECOM is built to deliver a better world. We design, build, finance and operate infrastructure assets for governments, businesses and organizations in more than 150 countries. As a fully integrated firm, we connect knowledge and experience across our global network of experts to help clients solve their most complex challenges. From high-performance buildings and infrastructure, to resilient communities and environments, to stable and secure nations, our work is transformative, differentiated and vital. A Fortune 500 firm, AECOM had revenue of approximately \$18.2 billion during fiscal year 2017. See how we deliver what others can only imagine at aecom.com and [@AECOM](https://twitter.com/AECOM).
