McWong and PLC Multipoint Team for New Multi-platform Wireless Mesh Photosensor

SACRAMENTO, Calif. and EVERETT, Wash. June 7, 2022— McWong International, a leading lighting and controls solutions provider, and PLC Multipoint, a recognized leader in photosensor technology, join in announcing the release of a new, multi-platform Bluetooth mesh photosensor. The new photosensor is the first commercially available, full-function closed loop photosensor capable of integrating into different Bluetooth mesh control platforms.

The device expands the range of control strategies available with Bluetooth mesh control systems to include robust daylighting control, a staple of building energy efficiency standards and high performance systems such as LEED. Energy savings can be accelerated with daylighting control as well, with annual energy savings ranging from 15-50% according to industry studies published over the past ten years.

The device features a range of 0-1,000 lux with a transmission range of 100 feet. Users can adjust numerous parameters, such as fade and ramp times and sensitivity. It's ideal for virtually any daylit interior space, including offices, conference rooms, retail operations, classrooms, hospital and healthcare spaces.

"We are delighted to team with PLC Multipoint to introduce this photosensor," says Stephen Zhou, Executive Vice President, McWong. "They bring well-established design and technical expertise to ensure the sensor is state-of-the-art. We look forward to integrating this device into our range of Bluetooth mesh control platforms."

Joseph Briscoe, Division Manager, PLC Multipoint adds, "The opportunity to work with McWong in developing an industry-first Bluetooth mesh photosensor was exceptional. Their commitment to delivering high quality, interoperable wireless control networks is admirable and we're pleased to participate in this offering."

The product will be featured by both companies at Lightfair 2022. McWong is located in Booth 1964 while PLC Multipoint is located in Booth 1731.

About McWong International

For 35+ years, McWong has produced superior lighting controls and related electrical power and protection components. Today, McWong has engineered IoT solutions for today's rapidly changing marketplace. With advanced design and manufacturing facilities, McWong offers extensive component choices for OEMs as well as robust solutions for contractors, ESCOs and facility managers. More information about McWong can be found at www.mcwonginc.com.

About PLC Multipoint

For more than 30 years, PLC Multipoint has been making a name for itself as a creator and producer of the industry's finest lighting sensor controls and has earned a reputation as the go-to resource for solving the most complex lighting control challenges. PLC Multipoint's product families include lighting control systems and daylighting sensors for a wide variety of applications. For more information, visit <http://www.plcmultipoint.com>.
